

AIR HANDLING SYSTEMS

**PLUG
AND
PLAY**

**THE COMPLETE SOLUTION!
ENGINEERED WITH PREMIUM FEATURES REQUIRED
FOR CONTROLLED TEMPERATURE AND HUMIDITY.**

Designed for connection to condensing units and building controls.

- Includes PLC Control System.
- Integrated FREE-Cooling is Optional.
- UL / CSA Approved Electrical Panels
- Arrives tested and ready to install.

RELIABLE COLD-STORAGE IS MUCH MORE THAN JUST MOVING AIR

KOOLJET is the COMPLETE SOLUTION.

- Roof Mounted One-Piece Refrigeration system.
- PLC Controller Systems can connect to building systems.
- Dehumidification Option.
- Free Cooling Option.
- Power Exhaust with EC Modulating Exhaust Fan.
- Economizer with Barometric Dampers.
- Foam Gasket for Roof Curbs.
- Roof Curbs with Galvanized Construction.
- Insulated PUF Access Panel Construction.
- Disposable Type Air Pre-filters.
- Pressure Differential Switch across filter.
- Rust proof frame with stainless steel drain pan.
- Low Noise Evaporator Centrifugal Fan
- Designed for the Ducted Outlet.
- Built-in Electrical Control panel.
- Non-fused electrical disconnect switch.
- UL/CSA Standards Approved Electrical Panel

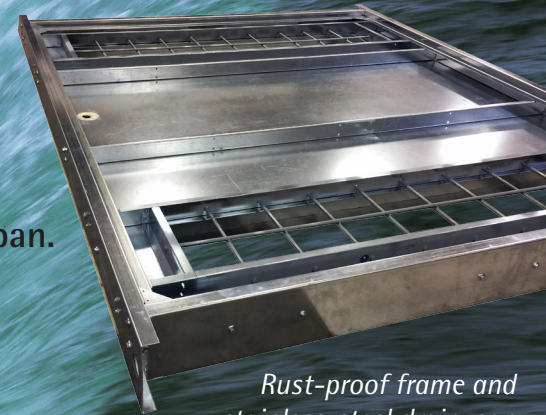

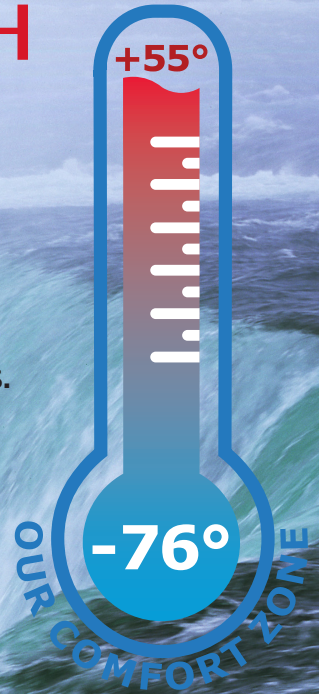

High-power centrifugal fan delivers excellent air volume to the space.

Connection points are easy to access. Access doors are leak-free.

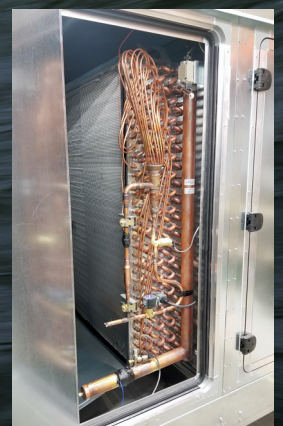

PLC Control System delivers highest degree of controlled precise operation and reliability.

Rust-proof frame and stainless-steel drain-pan

Interleaved refrigerant coils provide outstanding energy efficiency. Easy access for service.
